ON-LINE TRAINING - THIS FALL

You asked...we listened

We will be offering on-line training for users of our CheckMate software to save you travel time and expenses.

Stay tuned for more information...

CHECKMATE AFTER CLASS

Origin International provides webinars for CheckMate customers with an annual support plan. These webinars cover applications, procedures, advance commands that time does not allow in a standard training class.

These Webinar sessions are online training sessions that you can either: 1) register to view live or 2) download and view at your convenience.

If you missed the after class webinar Click Here to Download to view at your own convenience from www.originintl.com

UPCOMING WEBINAR

Generating Autosection Surface Measurements on Custom Flow Lines

Date: Thursday, Sept. 26th, 2013
Time: 11:00 am, EST (GMT-04:00)

Description: The webinar will show how to create custom Autosection surface measurements in a CheckMate segment. The measurements will follow CAD flow lines (custom curves) that the operator can generate on their part.

Click here to register for the meeting.

Once the host approves your request, you will receive a confirmation email with instructions for joining the meeting.

Note: If you already registered for this meeting, you do not need to

designer, diemaker, setter, or die maintenance technician, you will find it helpful to know which piece of the larger puzzle you are.

[Read on](#)...

Origin provides all the required software that takes over once the dies have made their first sample parts. Origin's software takes the part data from whatever measurement devices are used and establishes, first if the tooling is stable and if so analyses the data and produces a report indicating precisely where the die shop needs to make modifications so that future samples will be consistently to the CAD specs and are buy off acceptable.

CHECKMATE 12.1 Update -
OriginIntl.com

CheckMate - 12.1
Phase II 307 Update

⊕ CheckMate ✓

For customers who log in to our BBS. We have a new folder

called CheckMate 12.1 for this new release and other information related to it. ie. updates, how to unblock the help file etc.

Hardware Requirements for CheckMate:

- 32 bit/ 64 bit capability - able to run Windows XP-32Bit, Vista or Windows 7

- Minimum 4 gigabytes of RAM

- Ability to do Windows XP hardware simulation

- Multiple Cores - Scanning software uses multiple cores to increase the performance

UPGRADING TO WINDOWS 7

Take Note of the Following:

- The new CheckMate release 12.1 supports both 32 bit/64 bit.

- We recommend Windows 7 - 64 bit with "Administrator" rights

- Change your "Shortcuts" to run as administrator

Click Here for more details (*log in to our BBS*)
