"After installing SOLIDWORKS and CheckMate 14, I am Unable to Create CheckMate Measurements on my CAD"

SYMPTOM:

After installing SOLIDWORKS and CheckMate 14, picking points for measurements is unsuccessful. Measurements that you create on the CAD get projected out into space, if they get created at all.

SOLUTION: there are some setting in the SOLIDWORKS Options setting screen that need to be checked. We recommend that you try changing one setting at a time, and verify if that resolves the issue.
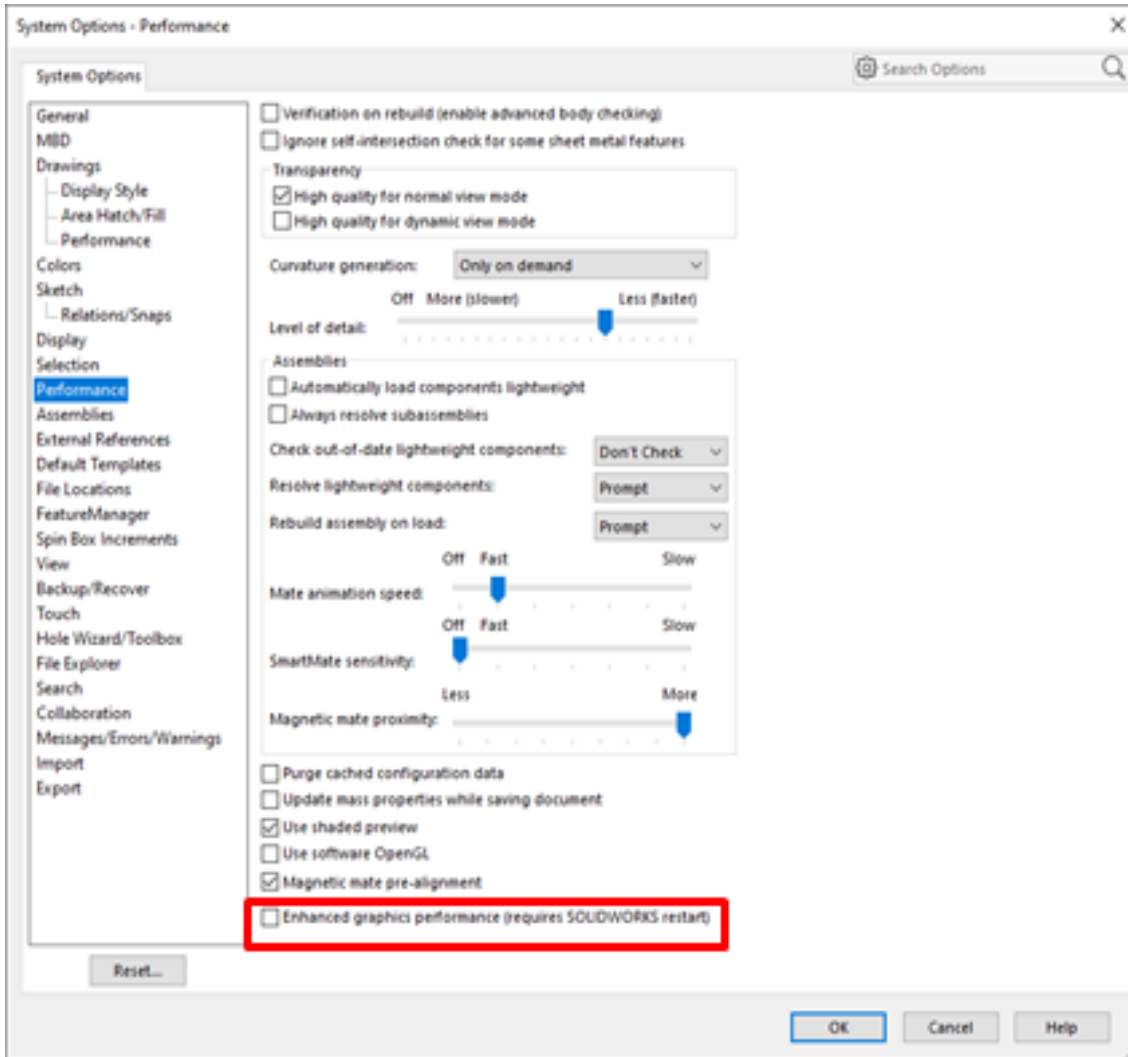

<div align="center">

1- Enhanced graphics performance

AND

2- 3D interconnect

Screenshots of both of these items are shown below.

</div>

1) Uncheck the "Enhanced graphics performance (requires SOLIDWORKS restart)" checkbox

2) Uncheck the "Enable 3D interconnect" checkbox
